

Fundación Chile Positivo

Fundación Chile Positivo

Fundación Chile Positivo is a non-profit organization based in Chile, working to create **HIV prevention** and **awareness strategies** throughout our country. Some of our work includes, but is not limited to, organizing **testing sites for HIV** throughout the country; doing **social research**; creating **training workshops** for young people and professionals from different fields, among other activities. Some of our partners and collaborators include UNAIDS, local universities, and government institutions such as the Ministry of Health, the National Youth Institute (INJUV), among others.

Regional Teams

- Antofagasta
- La Serena
- Santiago
- Temuco
- Puerto Montt
- Coyhaique

Some of our best practices

Health and
educational
fairs

HIV testing
sites

Educational
workshops

Research

Health and educational fairs

- As Chile Positivo, we participate in different health and educational fairs throughout the country. In these fairs, we provide people and particularly, young people, with **information on sexuality, Sexual Rights, HIV** and other **STI prevention** strategies.
- During these fairs we engage with people through different **fun games** such as: **answering questions**, how to properly **put a condom on a dildo** (and how to do it with your mouth), as well as other fun activities. We also share fun and educational documents like the **genderbread figure** to teach about sexuality and we also give away exterior and interior condoms and lube, at no cost.

HIV testing sites

- As Chile Positivo, we actively promote and organize HIV testing sites throughout Chile. We have travelled throughout the different regions of our country to bring HIV testing closer to communities and to young people (through HIV rapid tests).
- Which is why we have worked along universities, high schools and local governments to bring HIV testing to young people aged 14 and above.

Educational workshops

- As Chile Positivo, we use **different educational tools** to teach about HIV, HIV prevention and sexuality. These are especially important to use among young people, such as Kahoot and Menti. Kahoot allows participants to engage more in the subject because it's presented as a game where they can participate anonymously and earn prizes at the end.
- In our educational workshop we emphasize the **importance of including pleasure** as a relevant dimension of HIV prevention.

E-learning courses

OBJETIVOS DE DESARROLLO SOSTENIBLE

**CURSO DE INVIERNO 2020
E-LEARNING**

#HablemosDeVIH
